THE MARINE FLOORING PROCESS

Step 1

IF YOU HAVE DESIGN FILE

Please send your design file, and we'll produce the boat flooring accordingly.

Step 2

IF YOU DO NOT HAVE

Please provide your boat's brand and year, and we'll check for a template.

SeaRay - 220 Sundeck - 2006Year

Step 3

TEMPLATE FOR YOU

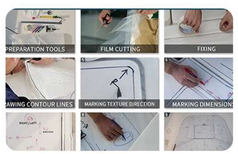

We suggest scanning your boat to get the DXF/DWG file. Send it to us, and we'll start production.

Step 4

MAKE A PAPER TEMPLATE

If you can't find help, we suggest making a paper template (photomodeler pictures) and sending it to us.

Step 5

BEFORE PRODUCTION

We'll design, confirm details with you, and send a proof before production.

Step 6

FINAL JOB

Once details are confirmed, we'll start production, send photos/videos for approval, and arrange UPS/FEDEX shipment. You need to install it yourself.

MARINE FLOORING BUSINESS

IF YOU OWN A CNC MACHINE

Starting a marine flooring business? Try our PE/EVA foam — UV resistant with 3M adhesive.

Melors uses high-density, UV-resistant PE/EVA foam and is an authorized 3M China distributor.

Melors provides CNC settings, custom bits, and 30×30cm samples for cutting tests.

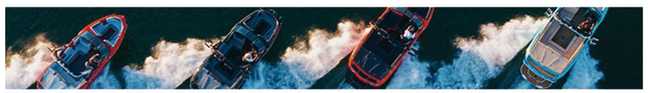

We'll offer professional suggestions after your sample test and send detailed costs.

Production begins after order confirmation, with QC, photos, and videos for your approval before shipment.

Start your marine flooring business as soon as the shipment arrives -- fantastic!!!

IF YOU DONT HAVE CNC MACHINE

Help boat owners scan flooring using Prodim or Photomodeler (DXF/DWG), or send us a plastic template.

We'll quote and design after receiving your file or template, and proceed once you confirm.

We'll CNC route the foam and send photos/videos for your confirmation before shipping.

We will arrange the UPS/FedEx/Sea shipping once you approve the photo.

You can help install the flooring—finished photos are greatly appreciated.

We recommend multiple jobs at once for best price and delivery time. Sample orders is available.
